

About the Donors

Michele Liebman earned a Bachelor of Science in technology and information management from Washington University in 1986. She currently serves on the committee for Women & Engineering and has been a William Greenleaf Eliot Society member since 2010.

Michele Liebman, BS '86

Liebman received a Washington University Engineering Alumni Achievement Award in 2015.

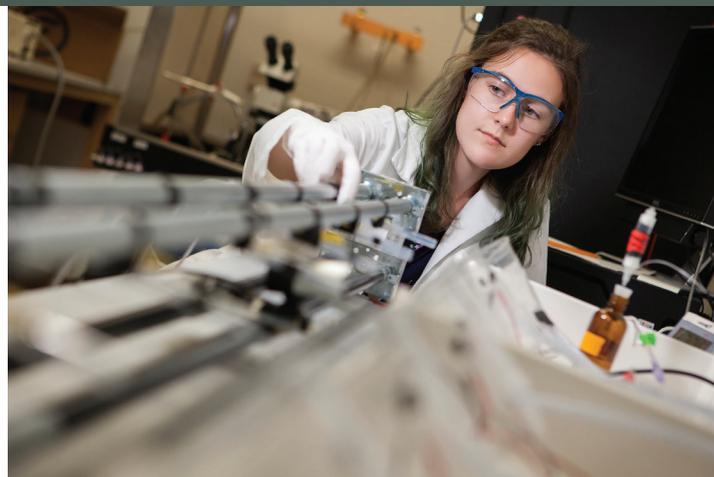

“I believe engineering skills and talents are gender neutral. I want to see an end to the idea that a woman is hired into an engineering role because of her gender and not her talent. That is why I support the Women & Engineering Program,” says Liebman.

Jan Holloway earned a Master of Science in applied mathematics and computer science from Washington University in 1983. Holloway serves on the School of Engineering & Applied Science National Council. She was named one of the *St. Louis Business Journal's* 25 Most Influential Women in Business in 2000, and she received a Washington University Engineering Alumni Achievement Award in 2010.

Jan Holloway, MS '83

Liebman and Holloway established the Women & Engineering Challenge fund with the hope of inspiring other alumni and friends to support diversity and encourage a strong community for female engineering students in the School of Engineering & Applied Science.

The Women & Engineering *Challenge for the William Greenleaf Eliot Society*

 Washington University in St. Louis
SCHOOL OF ENGINEERING & APPLIED SCIENCE

A Message from the Dean

Women & Engineering was established as an organization for engineering alumnae from Washington University to support each other; inspire and mentor our women students; and help shape the School of Engineering & Applied Science. As we continue to strengthen these engagements, I am pleased to present the Women & Engineering Challenge in support of a fund that will enable us to enhance the experience of our female students during their time on campus and broaden the opportunities that we are able to offer them.

We are deeply grateful to Jan Holloway, MS '83, and Michele Liebman, BS '86, for embracing these goals and providing this generous challenge, and we encourage alumni and friends to join us in this important endeavor.

We envision the Women & Engineering organization will develop and promote programming to provide a supportive community for our engineering alumnae, establish connections to women student organizations within the school, and also participate in STEM outreach targeting female students of all ages. Women & Engineering is a priority that will position the School of Engineering & Applied Science as a higher education leader to support a diverse, open, and inclusive environment.

I encourage you to participate in the Women & Engineering program as a peer, mentor, and donor. Accepting this challenge and joining the William Greenleaf Eliot Society will not only enrich the educational experience of our female students but also demonstrate your commitment to celebrate female engineers who paved the way and support future trailblazers in engineering.

Sincerely,

Aaron Bobick, PhD
Dean and James M. McKelvey Professor

How the Challenge Works

The Women & Engineering Challenge will provide the following for each gift of \$1,000 or more, up to a total of \$60,000. Gifts must be directed to the Women & Engineering Fund to receive matching dollars.

	Your gift	Match provides
New Eliot Society memberships (\$1,000 or more)	\$1	\$1
Eliot Society multi-year commitments	\$1	\$2

How Women & Engineering Fund Gifts Are Used

Your gift will go to work immediately to enhance diversity efforts in the School of Engineering & Applied Science. Women & Engineering Fund contributions:

- provide funding for student organizations that support women in engineering,
- help attract the best qualified students from diverse backgrounds, regardless of their financial circumstances,
- fund conference attendance, career advising, and free tutoring,
- expand undergraduate internship and job prospects for female engineering students, and
- increase networking and mentorship opportunities.

“Together we can advance the success of women engineers and inspire the next generation.”

— Jan Holloway, MS '83

Yes! I/We will participate in the Women & Engineering Challenge for the Eliot Society.

My/Our gift to support the Women & Engineering Fund at the School of Engineering & Applied Science will be funded as follows: *(See payment options below.)*

A multi-year pledge* to be paid over _____ years (up to five years) beginning _____:
 Year 1 \$ _____ Date _____ Year 4 \$ _____ Date _____
 Year 2 \$ _____ Date _____ Year 5 \$ _____ Date _____
 Year 3 \$ _____ Date _____ *(The fiscal year runs July 1 to June 30.)*

A recurring credit card gift as follows until canceled**:
 \$ _____ *(All of the payments must be the same amount.)*
 Annually Quarterly Monthly *(Check one.)*

A one-time gift of \$ _____.

This gift will be matched by _____
Name of company – please enclose matching gift form.

Name(s) _____

Address _____

City _____ State _____ ZIP _____

Telephone (_____) _____
 Home Business Cell

Preferred email _____

I/We prefer no Honor Roll listing.

Payment Options

Check *(Please make checks payable to Washington University.)*

Credit card

I/We intend to recommend this gift via:

a donor-advised fund a family foundation.

Name of fund or foundation _____

Other: _____

Credit card information

Amex Discover Mastercard Visa

Acct. No. _____ Exp. Date _____

Name on Card _____

Please print.

Signature _____

Your gift to Washington University is tax deductible to the extent allowed by U.S. and Canadian law.

**If your gift or pledge will be paid from a donor-advised fund or private foundation, your gift will be an “intention” and not a legally binding pledge.*

***You can change or discontinue your recurring gift at any time by contacting Alumni & Development at 877-215-2727 or annualfund@wustl.edu.*
